Subject: Circle of Excellence Nominees

**Robert Half International****Congratulations to all nominees of the Circle of Excellence Awards!**

During the Circle of Excellence event on March 17th 2011, there were 31 nominees for the UK of which you were one!

Congratulations!

Dedication to Excellence

In 5 years of working with Frederic, he has always shown great availability and thorough implication in the processing of data coming from our accounting software. In France, he has developed Boxi, a database software which allows the automation of sending out margins and revenues per consultant. Before Boxi, the data processing was manual, which obliged us to key in data, leading to errors and longer distribution times. On a monthly basis, Frederic also deals with the information coming from our different software systems (Evolia for payroll and Great Plains for Finance) checking the information on coherence. Frederic has also developed other functionality via Boxi, such as the integration of new French clients coming out of Evolia, quarterly revenue status per client, and most recently the development of consultant League Tables. The automation via Boxi allowed me to optimise my work and really upped my productivity! I don't have a lot of simple data entry work to do anymore, but have a more rewarding job of verifying data on Consultants margins and revenues. For all this development work, Frederic really deserves this award. Thank you very much, Frederic!

Best regards,

HR Department
